

ShadowProtect IT Edition

Bare Metal Restore (BMR) for Windows™ Servers / Desktops / Laptops

“Bare Metal Recovery, Fast Migration and Change Management for Windows™ servers, desktops and laptops in minutes with no software installation required”

Create, edit or restore backup images on as many servers, desktops and laptops as needed. Create Real-Time or cold state backups in minutes, no software installation required. Hardware Independent Restore (HIR) enables P2P, P2V, V2P and V2V restorations and migrations. Flexible licensing allows IT Professionals to use ShadowProtect IT Edition on as many servers, desktops and laptops as required.

Key Features of ShadowProtect IT Edition...

- Bare Metal Recovery (BMR) in minutes
- Live Real-Time imaging without installing software on the target system
- In-built Migration Tool using HIR (Hardware Independent Restore) technology
- Supports P2P, P2V, V2P AND V2V migrations in minutes
- Supports AMD to Intel and Intel to AMD migrations
- Supports single to multi-processor and multi to single-processor migrations
- Migrate an unlimited number of virtual systems during subscription period
- I/O disk throttling to minimise impact on production systems
- Creates Real-Time or cold state backup images
- Compress and encrypt backups for efficiency and security
- Configuration tools to manage domains, mapped drives and network resources
- Bootable recovery CD based on Microsoft™ WinPE and Vista PE
- Automatically detects hardware
- Dynamically add unlimited drivers ‘on the fly’
- Visual partitioning tool
- Write to Disk / CD / DVD / Blu-Ray or attached storage device such as NAS / SAN / USB and/or any network location
- No backup scheduling for IT Edition (Purchase Server or Desktop Edition for 15 minute incremental backups)
- Licensed by the technician, on an annual subscription basis
- Unlimited use on servers, desktops and laptops
- Unlimited USE 12 month subscription
- No software installation required

Exceptional Value!

Licensed by the technician for unlimited use for a 12 month subscription

ShadowProtect IT Edition - Important details & dependencies:

1. For real-time imaging, the target system must use Microsoft VSS e.g. Server 2003, Exchange 2003+, SQL 2005+, XP or Vista. In addition, most other Windows environments are supported for ‘Cold State’ imaging.
2. Point in time imaging - The IT Edition is designed as a point in time, Real-Time imaging solution with no scheduling capabilities. For advanced scheduling, Real-Time data & database protection & recovery, StorageCraft recommend the ShadowProtect Server, SBS or Desktop Editions

ShadowProtect IT Edition Key Uses:

1 Change Management Tool

Create an ExactState™ point in time image of your server, desktop or laptop prior to installation of a service pack, security update, new application, upgrade or any configuration changes

2 Testing a Disaster Recovery Plan

Fully test and prove your DR plan in a virtual environment utilising current data without disrupting production systems

3 Test Lab Environment

Create an ExactState™ point in time image of a production system and test changes, in a physical or virtual environment, to determine the impact before implementing in production

4 End of Lease Hardware Migrations

Migrate the O/S, databases, applications and data with ease when older, end of lease systems are replaced with new equipment

5 Break Fix

Typically, as long as the disk spins take an ExactState™ image and migrate to a different hardware platform in minutes

6 System and Database Migrations

Migrate a complete system and databases including all settings, preferences, configurations, from one hardware platform to a different hardware platform in minutes

7 VMWare™ Migrations

Unlimited number of P2V, V2P and V2V migrations
